Why Fancom

- We are our client's advocate in areas of technology they are unfamiliar with
- We are aware of and pay heed to industry best practices, codes and standards applied to communications infrastructure design and implementation -we review contractors' work for compliance to these quality, performance, safety and legal requirements
- We carry both general liability insurance and errors and omissions insurance
- We have never had a WSIB case brought against our firm
- We have no brand allegiance – we write performance based, brand agnostic specifications
- We believe in a collaborative “workshop” based process that educates and involves customers
- We have yet to lose a customer and enjoy significant repeat business
- We don't pass the buck or point fingers – we're responsible from beginning to end
- We carry the RCDD designation, the accreditation of choice for telecommunications design
